### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 5: The prior art of record neither shows nor suggests a cylindrical press-fit part located between a flange engaging part and an external screw portion of a beam angle adjusting mechanism, wherein said press-fit part is press-fit into a press-fit hole of a nut fixed to a pickup support part of an optical pickup.

Regarding independent claims 2 and 6: The prior art of record neither shows nor suggests an elliptical portion of an external screw portion of a pickup angle adjusting member, wherein a diameter of a circular section of a nut is smaller than a major axis of said elliptical portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sogawa et al (US Pat. No. 6493309 B2) show a pickup adjusting mechanism (see Fig. 1B, especially screw 6, chassis 1 and pickup 5). Kato (US Pat. No. 4340919) shows a head adjustment mechanism (see Fig. 3).

3. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
